

LED LIGHTS

Your aquarium deserves the BEST lighting system in the world:
Sicce LED Lighting!

Unique, Euro-modern design incorporating innovative technology and rendered in first quality materials.
Sicce LED Lighting offers two models to meet any aquarium lighting need.

Sicce LED Lighting, a product of over 30 years of technical and design experience, provides these important features:

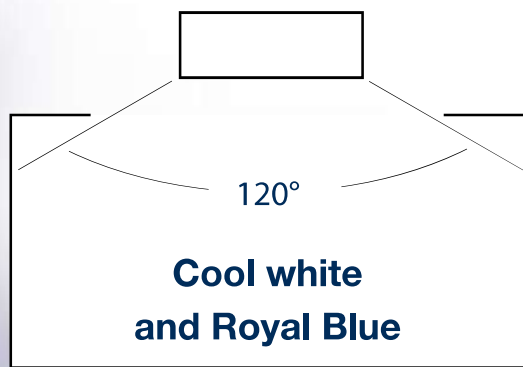

- High-efficiency LED lamps for maximum lumen output and minimal power consumption
- Optimized for even illumination over the entire tank
- Safe, efficient and SILENT heat dissipation without noisy fans
- Light spectrum does not shift over time
- Modular design is ready to upgrade when you are
- Built-in timer with sunrise/sunset program option
